

## MVP

---

## Phase 2

User Prompts  
Alexa to open  
GitSchooled

DarkSky API  
to check weather at hogwarts

Welcome Muggle! Now brewing up  
potions 401, you can either hear the  
potion of the moment or gitSchooled.  
Which option would you like to choose?

GitSchooled

Potion of the  
Moment

Ok, first off, I must ask, is your  
name John?

Yes

No

Sorry squib..... (reads full  
"error" from 301 page)

Alexa reads all  
{POTION TITLES}  
in Database.

Ok, my pick for potion of the moment is  
{POTION TITLE}. You'll need to collent  
{POTION INGREDIENTS} to brew it. Once  
you have that, {INSTRUCTIONS}

User ends session by  
finishing list or uttering  
"Alexa Stop"

User ends session by  
finishing list or uttering  
"Alexa Stop"

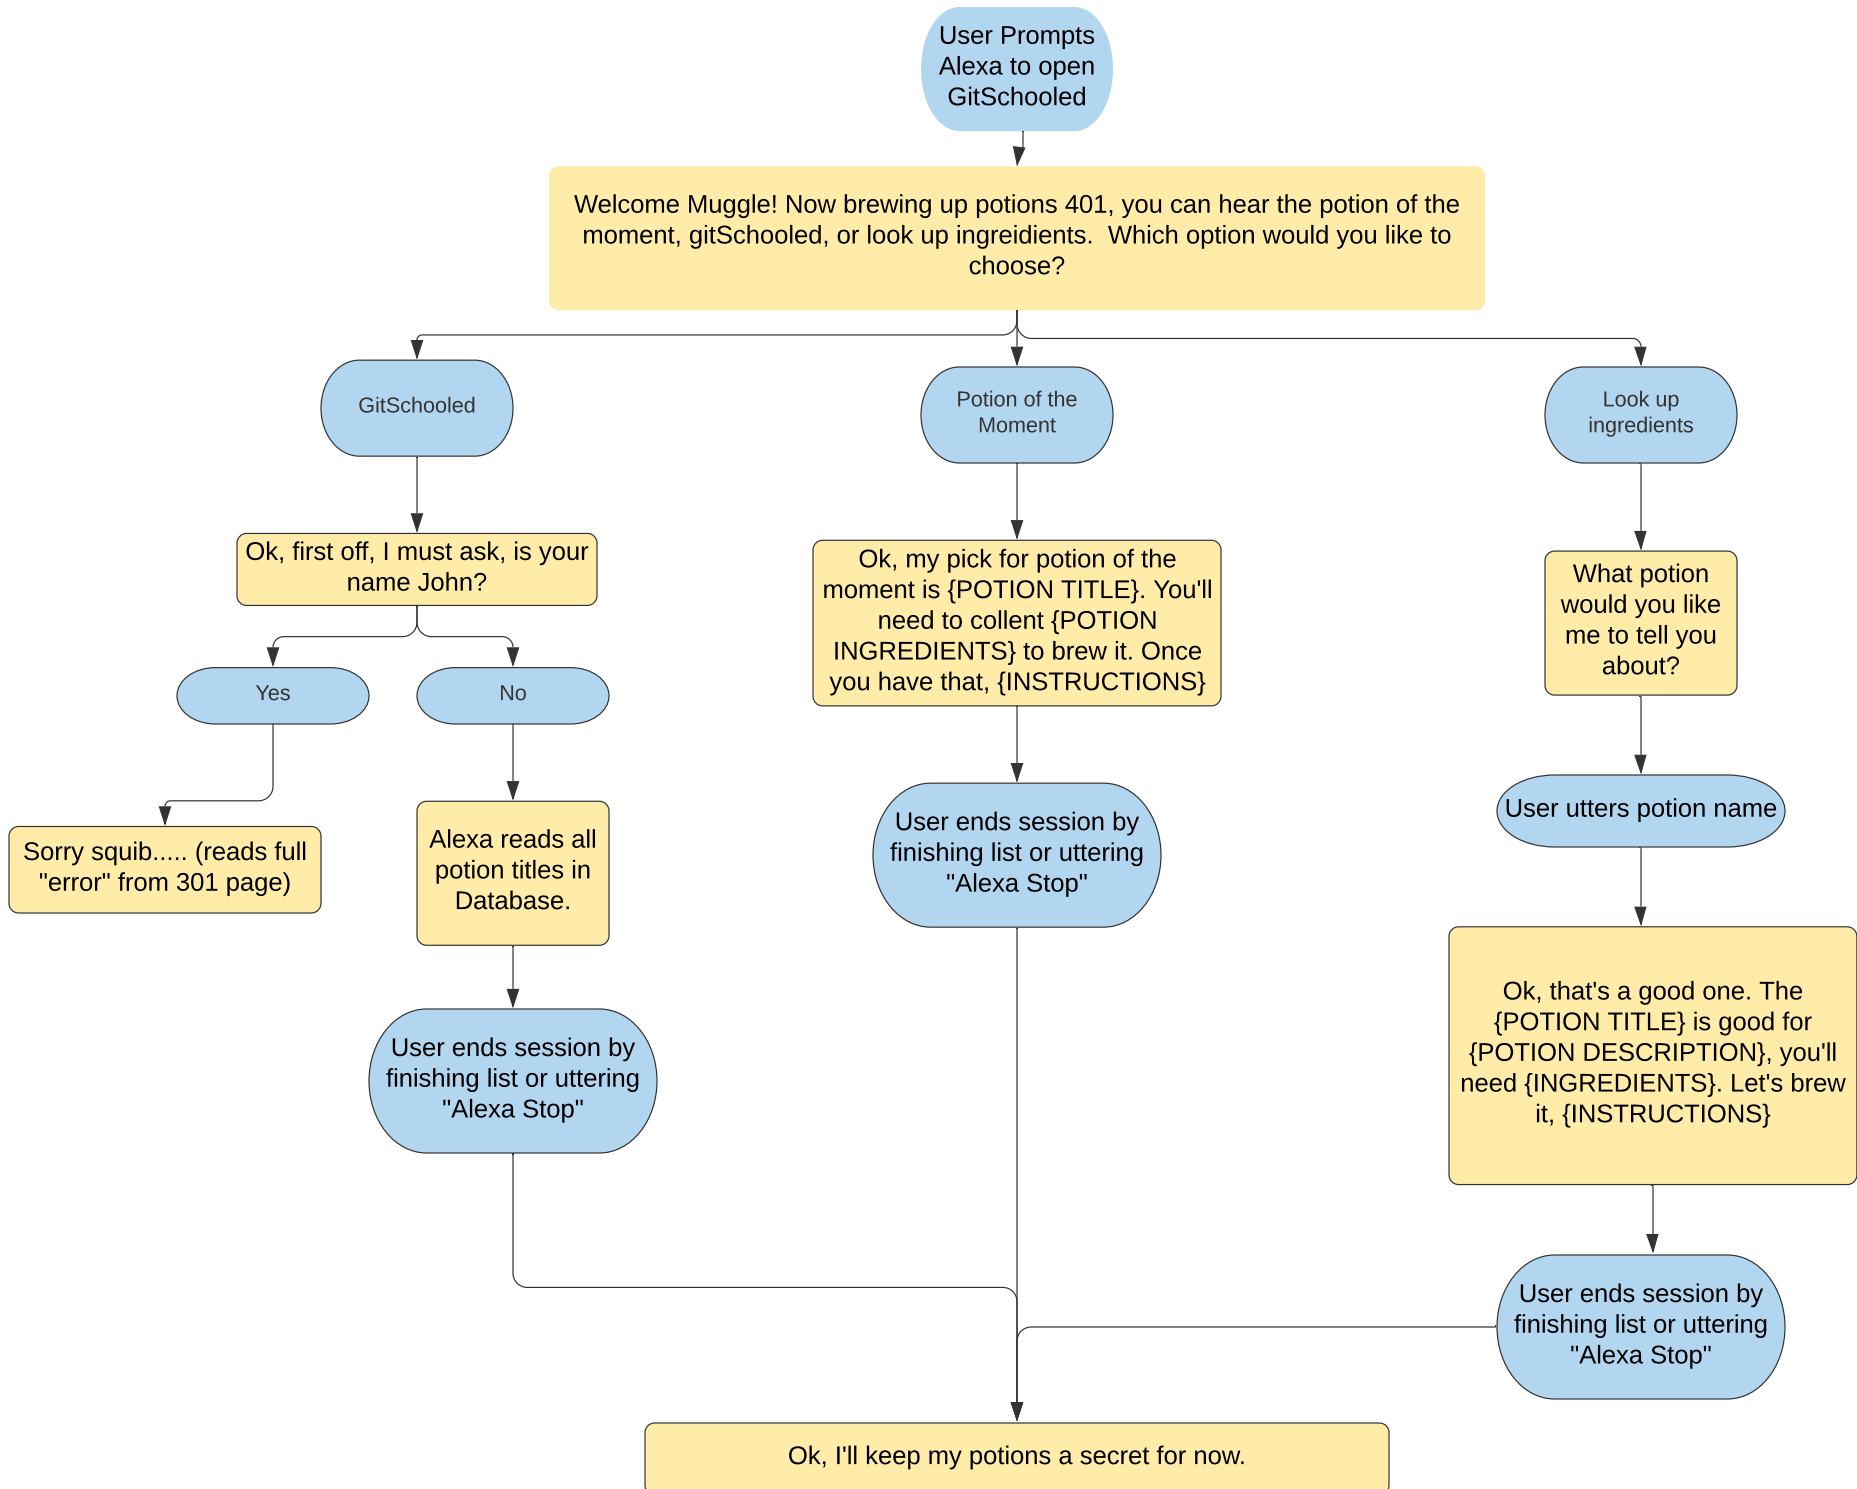

Ok, I'll keep my potions a secret for now.

Use the gobal  
variable with  
potions

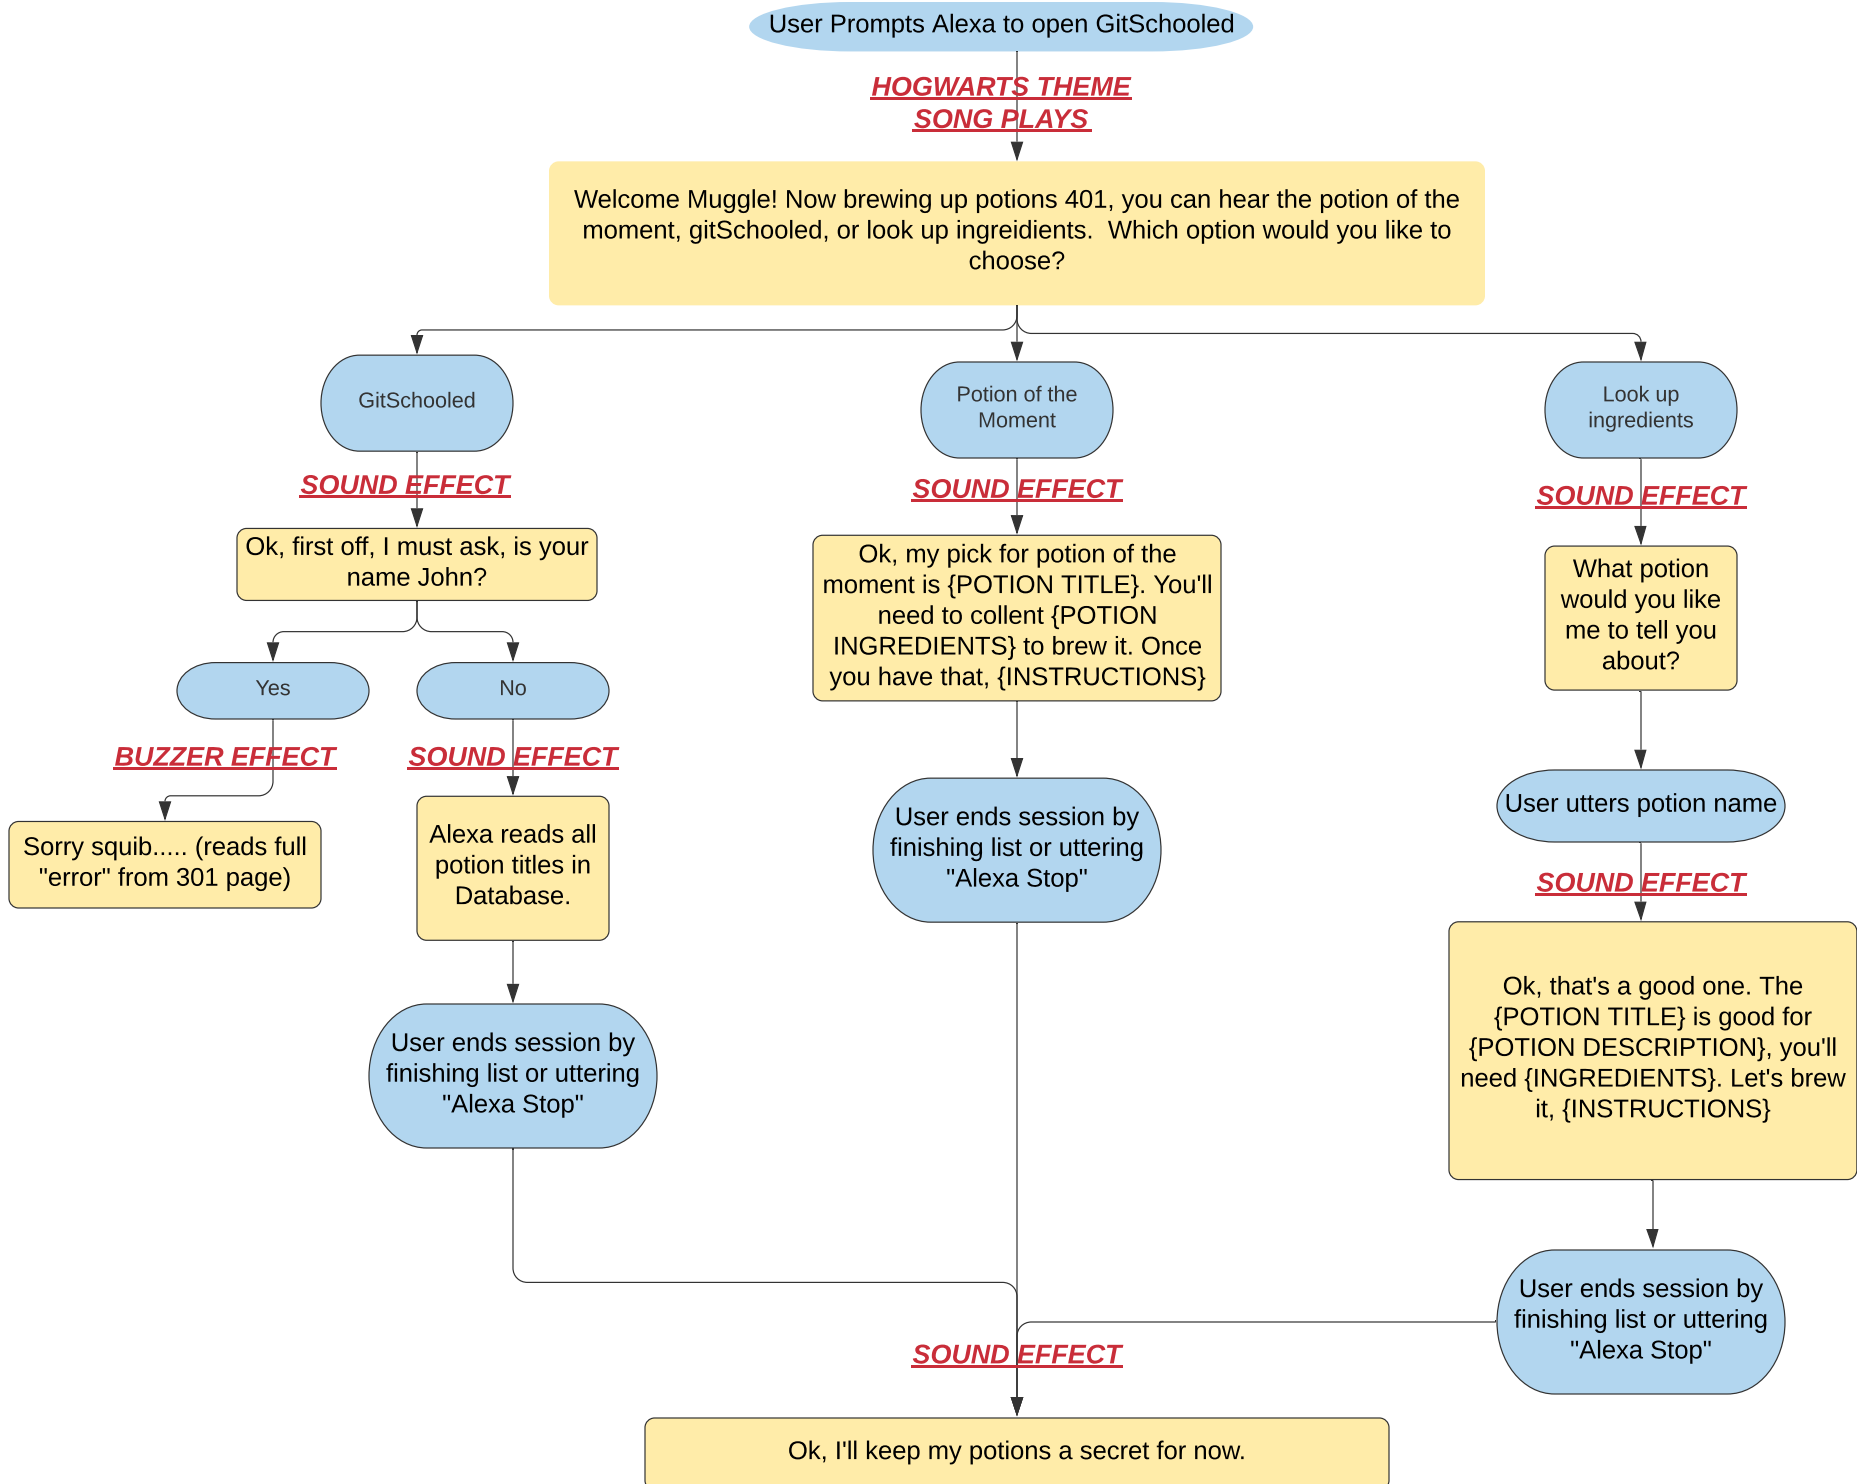

GitSchooled DB  
to grab potions info and is stuffed  
into a global variable
